Warehouse Utilization

Total Transportation Cost by Region and Category

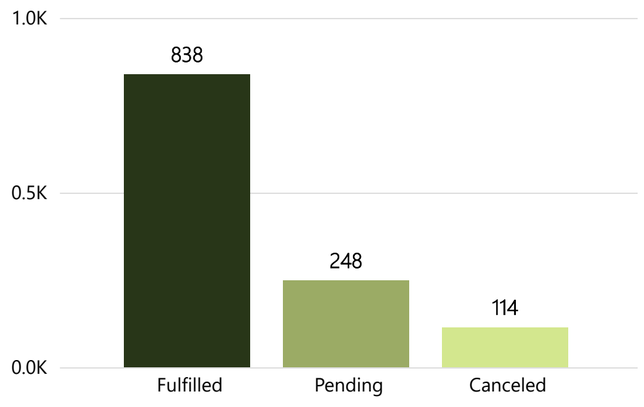

Units Sold by Year

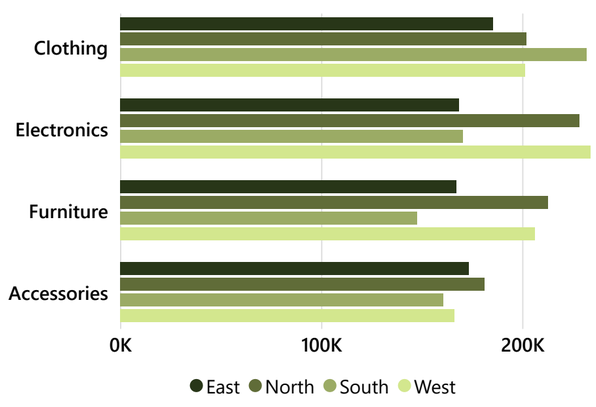

Average Lead Time by Category

Count of Backorder by Order Status

Sum of Inventory Level by Category and Region

Overview : Warehouse utilization is only 34.08% against a 75% target, even though inventory moves fast (turnover ratio 23.47, 15.56 days of sales in stock), so there is significant unused capacity. Units sold dropped to near zero in 2021 before recovering to about 200K by 2022 and holding steady through 2024, while transportation costs peak for Electronics in the West and Furniture in the North. Of the backorders, about 70% were fulfilled, 21% are still pending and nearly 10% were canceled, so clearing those and raising warehouse utilization are the main priorities.
